In 2013 we repaired 350 wheelchairs in the whole year – in 2019 we repaired 3,500 wheelchairs!!

- The 12 technicians with disabilities who repair the chairs now have full-time, fair wage employment.
- Working in highly visible public areas; we realized that by having People with Disabilities, their family members and the general public see others with disabilities carrying out skilled work has a profound, life-changing impact on the future opportunities of all People with Disabilities.
- It is worth mentioning the positive ecological effect of the program: “Reduce, Reuse, Recycle.” Many of the wheelchairs repaired would have ended up in the trash.
- The wheelchairs are not only repaired, but customized and fitting both to the special needs of each user, as well as to their personal esthetic preferences.
